A large scale upper low pressure system spread wet snow into Northern Illinois, Northwestern Indiana and Southern Wisconsin early Tuesday morning. With the warm ground amounts were much higher on snow boards and cold surfaces with heaviest amounts across the west and southwest suburbs with some local amounts 3 to 4 inches. Most other areas west of I-294 had 1-3 inches, and east of I-294 less than 1 inch. Temperatures were in the low 30s early then rose to 37-39 degrees by early afternoon causing the snow to change to light rain and drizzle or light rain and snow, with most of the snow melting. Light drizzle mixed with snow redeveloped later Tuesday into the evening bringing additional minor accumulations to most locations except in East-Central Lake County where a narrow band of 4-6 inches of snow fell covering all pavements. There was an additional dusting of snow early Wednesday.
