A large slow moving upper air low pressure system over the Midwest continued to bring periods of snowshowers and flurries to Northern Illinois Friday through early Saturday morning bringing light accumulations of snow throughout the region. Heaviest accumulations were mainly east of I-355 east to the lakeshore and in Northwest Indiana. Brisk northwest winds brought colder air with temperatures falling into the low to middle 20's, and causing some blowing and drifting of the snow. Meteorologist: Tom Piazza, CCM
