As the main storm system moved off to the east, an arctic cold front pushed southward through the Upper Midwest bringing another period of light snow late Wednesday into Thursday morning. Amounts were mostly a few tenths of an inch up to around 1 inch. Temperatures Wednesday evening were in the low 30S but fell into the 20s to upper teens Thursday morning. Winds picked up early Thursday to cause some minor drifting snow.

All details contained herein are made subject to the inherent limitations of the science of Meteorology. The data is based upon reports received from the National Weather Service and Cooperative Observers. Start and Stop times are taken from the nearest National Weather Service Observation Reporting Station. The data has been evaluated by our staff of professional meteorologists and determined to be accurate and representative of these locations. We do reserve the right to make changes to this report upon receipt of further meteorological data if we deem it necessary.
