Bands of snowshowers moved across Northern Illinois and Southern Wisconsin on Friday as another frontal system swept across the Midwest and Great Lakes. Some of these snowshowers brought a brief period of moderate to heavy snow that brought a quick accumulation of 1/2 to 1.5 inches of snow in many areas. Temperatures were in the 20s during the snow but rose to the middle 30s late in the day before falling back below freezing in the evening. Winds caused blowing and drifting of the snow. Meteorologist: Tom Piazza, CCM.

All details contained herein are made subject to the inherent limitations of the science of Meteorology. The data is based upon reports received from the National Weather Service and Cooperative Observers. Start and Stop times are taken from the nearest National Weather Service Observation Reporting Station. The data has been evaluated by our staff of professional meteorologists and determined to be accurate and representative of these locations. We do reserve the right to make changes to this report upon receipt of further meteorological data if we deem it necessary.
